

Please reject the NAB's petition 04-160 trying to stop XM radio from providing local traffic & weather updates. XM radio is a service that I pay for and the National Association of Broadcasters should not dictate what I can or cannot listen to. If the local stations would provide better music stations, news and sports shows, I would not have to resort to paying for a service and equipment that I can get for free.

Sincerely,

Miye Horwitz
